

# Milipol Paris 2025:

## The leading event for homeland security and safety

Images: Anne Emmanuelle Thion

SINCE ITS CREATION IN 1984, Milipol Paris has established itself as the major event in the field of homeland security and safety. Organised every two years under the aegis of the French Ministry of the Interior in partnership with numerous national and international institutions, the event stands out for its ability to bring together experts, companies, and institutions to address critical public and private security issues.

The next edition of Milipol Paris will take place from November 18 to 21, 2025, at the Paris-Nord Villepinte Exhibition Centre. Over the course of four days, visitors and exhibitors will have the chance to explore the latest technological innovations, establish connections with prominent industry players, and engage in conferences and activities that explore the forefront of global security issues.

The 2023 edition of Milipol Paris was a resounding success, reaffirming its status as a global reference event. More than 1,116 exhibitors, 65 per cent of them international, showcased their products and solutions. The event welcomed 30,084 professionals from 160 nationalities, with 44 per cent international attendees. Moreover, 175

official delegations from 60 countries attended, fostering valuable exchanges across governments and agencies.

For over 40 years, the Milipol brand has been synonymous with high-quality international exhibitions focused on homeland security. Over time, the brand has been proudly represented by Milipol Paris, Milipol Qatar, Milipol India, and Milipol TechX. The Milipol Network has become the leading network of events dedicated to solutions, technologies, and innovations for safety and homeland security.

The upcoming edition promises to be exceptional, offering participants exciting new features and providing a productive and convivial atmosphere for all stakeholders to push boundaries and envision the future.

In 2025, a major innovation will make its debut! In 2023, the public enjoyed several live demonstrations by the French special forces, such as RAID, GIGN, DOPC/BI, and civil defence units. To further immerse attendees in the fascinating world of special operations, Milipol introduces the Demo Arena, a new area dedicated to dynamic demonstrations by elite units and expert companies from the sector represented at the exhibition.

Don't miss this opportunity to observe the extraordinary skills and achievements of these elite professionals committed to national security and maintaining peace.

In addition to this new zone, visitors will find the Milipol Lab (entirely dedicated to start-ups and new technologies), the New-comers Exhibitor Village, the Forensics Zone (focusing on research and innovation with international forensic experts), and the Crisis Management Area.

Anne Frayssinet, Milipol Paris Event Director, stated: "Our ambition for Milipol Paris 2025 is to have an even greater influence on our ecosystem, with a great number of new features. We are enhancing the 'live' dimension of the show with a brand new Demo Arena. We are also changing our sectorisation to make it easier to visit the show, as well as developing new services to make it more comfortable and encourage exchanges. To sum up, Milipol Paris 2025 will offer even more business, innovation and international scope, with more exhibitors and visitors."

Beyond the exhibition itself, Milipol Paris is also a place for sharing knowledge and expertise. The conference programme,

in partnership with the Institute of Advanced Studies of the Ministry of the Interior (IHEMI), is particularly awaited, featuring strategic themes designed to shine a light on the challenges facing the homeland security sector. Renowned experts will lead these sessions, offering unique insights into current trends and upcoming challenges. In 2023, about 40 conferences brought together experts and decision-makers. The Innov'Arena, located in the Milipol Lab area, will also host inspiring talks focused on innovation and sector advancements.

A key highlight remains the prestigious Milipol Innovation Awards, rewarding bold and effective solutions in security. This platform showcases technological breakthroughs in areas such as cybersecurity, drones and anti-drones, robotics, CSR, and equipment, giving companies strong visibility during the exhibition.

Participants eagerly anticipate the official opening by the Interior Minister and the inaugural conference featuring international experts.

More than 30,000 visitors and 1,100 exhibitors are expected, with around 70 per cent of exhibitors already registered for 2025, including Airbus, Axon, Beretta Defense Technologies, Chapvision, Hi-Tech Detection Systems, International Armored Group, Idemia, Libervit, Sopra Steria, Texelis, Thales and others. The exhibition provides an ideal platform to build strategic connections, form partnerships, and explore trends.

Milipol Paris is structured into various thematic zones to better meet visitors' and exhibitors' needs. Among the activities and technologies represented, cybersecurity holds a central place, focusing on protecting information systems and combating cyber threats. The security of critical infrastructure will also be highlighted, featuring solutions, aimed at anticipating risks on strategic sites.

Save the date from November 18 to 21, 2025, at the Paris-Nord Villepinte Exhibition Centre and join the dynamic Milipol universe. This unique opportunity offers a chance to discover emerging technologies, attend live presentations, and engage with leaders and specialists. Whether you are a company seeking solutions or a professional curious about the latest advancements in the sector,

Milipol Paris is the must-attend event. Don't wait, and secure your spot now to be part of this essential gathering shaping the future of homeland security and safety.
